EDUCATION

Bachelor of Technology (B.Tech) — Computer Science & Engineering Aug 2024 – May 2028

Poornima College of Engineering, Jaipur, Rajasthan CGPA: 9.20 / 10.0

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL

Frontend: React.js, HTML5, CSS3, Responsive Design

Backend: Node.js, Express.js, REST APIs, Flask/FastAPI

Databases: MongoDB, MySQL

AI / ML: Supervised & Unsupervised Learning, ANN, CNN, RNN, RAG, GANs, Agentic AI, NLP, Computer Vision

Tools & Platforms: Git, GitHub, Postman, VS Code, OpenCV

Core CS: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems

PROJECTS

AI Gym Trainer | *Python, OpenCV, MediaPipe, WebRTC, Deep Learning*

- Built a real-time AI fitness coach using computer vision and pose estimation, achieving 92% rep-count accuracy at 25 FPS.
- Developed posture correction and workout tracking for 5 exercises, providing automated form feedback.
- Optimized inference latency to under 100 ms and integrated real-time voice coaching via WebRTC streaming.

ATS Resume Analyzer & Semantic Matching System | *Python, BERT, spaCy, Scikit-learn, NLP, Flask*

- Built an end-to-end NLP pipeline to parse resumes and job descriptions, extracting structured entities (skills, roles, education) using spaCy and BERT-based semantic embeddings for contextual understanding.
- Implemented semantic similarity scoring using BERT embeddings and cosine similarity, enabling intelligent candidate-to-job-description matching with automated ATS compatibility score generation.
- Developed a keyword gap analysis and resume recommendation engine that identifies missing skills and provides prioritized improvement suggestions to optimize job application success rates.
- Integrated candidate ranking module to sort applicants by relevance score, streamlining recruiter workflows and reducing manual screening effort.

AI Chat Assistant — Full-Stack ChatGPT Clone | *React.js, Node.js, Express.js, MongoDB, LLM APIs*

- Architected and deployed a full-stack conversational AI application (MERN stack) integrating third-party LLM APIs to deliver context-aware, natural language responses with persistent multi-turn conversation history.
- Built a responsive React.js chat interface with real-time messaging, conversation threading, and session management, supporting a smooth user experience across devices.
- Designed RESTful backend services with Node.js and Express.js handling authentication, API orchestration, and chat workflow management; used MongoDB to persist user profiles and conversation history.

AI Attendance Management System | *Python, OpenCV, Face Recognition, Flask, Pandas*

- Developed an automated attendance tracking system using facial recognition (OpenCV + face_recognition library) to identify students from classroom images, eliminating manual roll-call with ~95% detection accuracy.
- Built an end-to-end pipeline covering face detection, student identification, attendance logging, and report generation, reducing administrative overhead by automating a previously manual process.
- Designed a Flask-based web interface with attendance history tracking, CSV report generation, and a student database integration for administrators and faculty.

CERTIFICATIONS

- AI-Powered Innovation: Tools, Tactics & Transformation — AICTE (2024)
- Prompt Engineering for ChatGPT — Coursera / Vanderbilt University

ACHIEVEMENTS & CODING PROFILES

- LeetCode: Solved 300+ problems (100 Easy, 170 Medium, 30 Hard) — username: starbuggs — demonstrating strong proficiency in DSA and algorithmic problem-solving.
- Maintained a 9.20/10 CGPA through Semester 4 at Poornima College of Engineering, consistently ranking among top performers in the batch.
