

AI-Enabled Cybersecurity Risk Assessment & Compliance Platform

Assessment Report

Assessment ID	3
University	PCE
Assessment Mode	QUESTIONNAIRE
Generated Time	16-07-2026 19:58

Executive Summary

10 security controls require implementation.

Compliance Score	39.00 %
Overall Risk Score	35.40
Risk Level	Medium
Overall Priority	CRITICAL

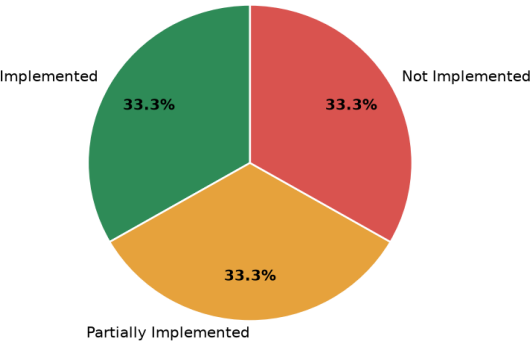

Immediate Actions

- Implement a patch management process to ensure timely application of security patches
- Implement a vulnerability management process to identify, assess, and remediate vulnerabilities
- Implement network security controls to prevent unauthorized access and protect institutional systems and data

AI Recommendations

C022 - Patch Management

Priority	Timeline	Estimated Effort	Implementation Cost
CRITICAL	60-90 Days	High	High

Root Cause: Lack of effective patch management process

Recommendation: Implement a patch management process to ensure timely application of security patches

Technical Steps

- Develop a patch management policy
- Identify and prioritize patches based on risk and severity
- Implement automated patch deployment tools

Policy Steps

- Establish a patch management team
- Define patch management procedures
- Develop a patch testing and validation process

Business Impact: Reduced risk of cyber attacks and system compromise

Success Metrics

- Percentage of patches applied within 30 days of release
- Number of vulnerabilities remediated
- Time-to-patch metric

C023 - Vulnerability Management

Priority	Timeline	Estimated Effort	Implementation Cost
CRITICAL	60-90 Days	High	High

Root Cause: Lack of effective vulnerability management process

Recommendation: Implement a vulnerability management process to identify, assess, and remediate vulnerabilities

Technical Steps

- Develop a vulnerability management policy
- Implement vulnerability scanning and assessment tools
- Prioritize vulnerabilities based on risk and severity

Policy Steps

- Establish a vulnerability management team
- Define vulnerability management procedures
- Develop a vulnerability remediation plan

Business Impact: Reduced risk of cyber attacks and system compromise

Success Metrics

- Number of vulnerabilities identified and remediated
- Percentage of vulnerabilities remediated within 30 days of identification
- Time-to-remediate metric

C027 - Network Security

Priority	Timeline	Estimated Effort	Implementation Cost
CRITICAL	60-90 Days	High	High

Root Cause: Lack of effective network security controls

Recommendation: Implement network security controls to prevent unauthorized access and protect institutional systems and data

Technical Steps

- Develop a network security policy
- Implement firewalls and intrusion detection/prevention systems
- Configure network segmentation and access controls

Policy Steps

- Establish a network security team
- Define network security procedures
- Develop a network security incident response plan

Business Impact: Reduced risk of unauthorized access and cyber attacks

Success Metrics

- Number of network security incidents
- Percentage of network traffic inspected and blocked
- Time-to-detect metric

C028 - Firewall Management

Priority	Timeline	Estimated Effort	Implementation Cost
CRITICAL	60-90 Days	High	High

Root Cause: Lack of effective firewall management

Recommendation: Implement firewall management to prevent unauthorized access and protect institutional systems and data

Technical Steps

- Develop a firewall management policy
- Implement firewall configuration and change management processes
- Configure firewall rules and access controls

Policy Steps

- Establish a firewall management team
- Define firewall management procedures
- Develop a firewall incident response plan

Business Impact: Reduced risk of unauthorized access and cyber attacks

Success Metrics

- Number of firewall rules and access controls
- Percentage of firewall traffic inspected and blocked
- Time-to-detect metric

C030 - Secure Remote Access

Priority	Timeline	Estimated Effort	Implementation Cost
CRITICAL	60-90 Days	High	High

Root Cause: Lack of effective secure remote access controls

Recommendation: Implement secure remote access controls to prevent unauthorized access and protect institutional systems and data

Technical Steps

- Develop a secure remote access policy
- Implement virtual private network (VPN) and multi-factor authentication (MFA) solutions
- Configure remote access protocols and access controls

Policy Steps

- Establish a secure remote access team
- Define secure remote access procedures
- Develop a secure remote access incident response plan

Business Impact: Reduced risk of unauthorized access and cyber attacks

Success Metrics

- Number of secure remote access connections
- Percentage of remote access traffic inspected and blocked
- Time-to-detect metric

C047 - Student Data Protection

Priority	Timeline	Estimated Effort	Implementation Cost
CRITICAL	60-90 Days	High	High

Root Cause: Lack of effective student data protection controls

Recommendation: Implement student data protection controls to prevent unauthorized access and protect student personal data

Technical Steps

- Develop a student data protection policy
- Implement data encryption and access controls
- Configure data backup and recovery processes

Policy Steps

- Establish a student data protection team
- Define student data protection procedures
- Develop a student data protection incident response plan

Business Impact: Reduced risk of unauthorized access and data breaches

Success Metrics

- Number of student data protection incidents
- Percentage of student data encrypted and protected
- Time-to-detect metric

C048 - Faculty & Staff Data Protection

Priority	Timeline	Estimated Effort	Implementation Cost
CRITICAL	60-90 Days	High	High

Root Cause: Lack of effective faculty and staff data protection controls

Recommendation: Implement faculty and staff data protection controls to prevent unauthorized access and protect faculty and staff personal data

Technical Steps

- Develop a faculty and staff data protection policy
- Implement data encryption and access controls
- Configure data backup and recovery processes

Policy Steps

- Establish a faculty and staff data protection team
- Define faculty and staff data protection procedures
- Develop a faculty and staff data protection incident response plan

Business Impact: Reduced risk of unauthorized access and data breaches

Success Metrics

- Number of faculty and staff data protection incidents
- Percentage of faculty and staff data encrypted and protected
- Time-to-detect metric

C021 - Secure Configuration Management

Priority	Timeline	Estimated Effort	Implementation Cost
CRITICAL	30-60 Days	Medium	Medium

Root Cause: Lack of effective secure configuration management

Recommendation: Implement secure configuration management to prevent unauthorized access and protect institutional systems and data

Technical Steps

- Develop a secure configuration management policy
- Implement configuration management tools and processes
- Configure secure default settings and access controls

Policy Steps

- Establish a secure configuration management team
- Define secure configuration management procedures
- Develop a secure configuration management incident response plan

Business Impact: Reduced risk of unauthorized access and cyber attacks

Success Metrics

- Number of secure configurations implemented
- Percentage of systems and applications configured securely
- Time-to-detect metric

C024 - Malware Protection

Priority	Timeline	Estimated Effort	Implementation Cost
CRITICAL	30-60 Days	Medium	Medium

Root Cause: Lack of effective malware protection

Recommendation: Implement malware protection to prevent unauthorized access and protect institutional systems and data

Technical Steps

- Develop a malware protection policy
- Implement anti-malware software and tools
- Configure malware detection and response processes

Policy Steps

- Establish a malware protection team
- Define malware protection procedures
- Develop a malware protection incident response plan

Business Impact: Reduced risk of unauthorized access and cyber attacks

Success Metrics

- Number of malware incidents
- Percentage of systems and applications protected by anti-malware software
- Time-to-detect metric

C025 - Endpoint Security

Priority	Timeline	Estimated Effort	Implementation Cost
CRITICAL	30-60 Days	Medium	Medium

Root Cause: Lack of effective endpoint security

Recommendation: Implement endpoint security to prevent unauthorized access and protect institutional systems and data

Technical Steps

- Develop an endpoint security policy
- Implement endpoint security software and tools
- Configure endpoint security settings and access controls

Policy Steps

- Establish an endpoint security team
 - Define endpoint security procedures
 - Develop an endpoint security incident response plan
- Business Impact:** Reduced risk of unauthorized access and cyber attacks

Success Metrics

- Number of endpoint security incidents
- Percentage of endpoints protected by endpoint security software
- Time-to-detect metric

Implementation Roadmap

Timeframe	Planned Activity
Immediate	- Implement a patch management process to ensure timely application of security patches - Implement a vulnerability management process to identify, assess, and remediate vulnerabilities - Implement network security controls to prevent unauthorized access and protect institutional systems and data
30 Days	No activities scheduled.
60 Days	- C021 - Secure Configuration Management - C024 - Malware Protection - C025 - Endpoint Security
90 Days	- C022 - Patch Management - C023 - Vulnerability Management - C027 - Network Security - C028 - Firewall Management - C030 - Secure Remote Access - C047 - Student Data Protection - C048 - Faculty & Staff Data Protection
